MOBILE APPLICATION SECURITY

## Learn | Research | Innovate

Career Guidance from Cyber Security Expert : Mohit Yadav

COURSE DESCRIPTION

CRAW SECURITY also provides courses for Mobile Application Security. Our course of Mobile Application Security goal is to identify all vulnerabilities in Mobile applications and assist to remove these vulnerabilities from the mobile application. The mobile application has become an essential part of our lives as our dependence on our smartphones has grown and securing them is a crucial requirement. Penetration Testing can provide us with a certain level of confidence, but hacking into mobile applications demands a different approach and setup than with Web Applications.
