Penetration Testing course is purely a real hard-core Practical based Penetration testing Process to test the Network, web application, thick client, mobile application, IoT devices, and much more.

## Advanced Penetration Testing Course Contents

- Module 01: Introduction
- Module 02: In-Depth Scanning
- Module 03: Exploitation
- Module 04: Command Line Fun
- Module 05: Getting Comfortable with Kali Linux
- Module 06: Bash Scripting
- Module 07: Practical Tools
- Module 08: Active Information Gathering
- Module 09: Passive Information Gathering
- Module 10: Introduction to Buffer Overflows
- Module 11: Buffer Overflows
- Module 12: Fixing Exploits
- Module 13: Locating Public Exploits
- Module 14: Antivirus Evasion
- Module 15: File Transfers
- Module 16: Windows Privilege Escalation
- Module 17: Linux Privilege Escalation
- Module 18: Password Attacks
- Module 19: Port Redirection and Tunneling
- Module 20: Active Directory Attacks
- Module 21: Power Shell Empire
- Module 22: Trying Harder: The Labs
- Module 23: Penetration Test Breakdown

## Course Highlights

Course Duration :  
60 Hours

---

Language :  
Hindi | English

---

Delivery Methods :  
Classroom Training |  
Online Training

---

Duration of Program

- > 30 Days (2 Hours per Day)
- > 15 Days (4 Hours per Day)
- > 12 Days (5 Hours per Day)
- > 5 Days (12 Hours per Day)

---

Complete Study material and  
required Software & certification  
will be provided during the  
course.

## WHAT CRAW SECURITY PROVIDES

We will provide you with the best curriculum with in-depth information possessing industrial secrets and experienced facts from our well-qualified and experienced teaching faculties and mentors.

Our main focus is to give long-lasting learning experiences to our students with cost-efficient prices to almost every financial section of society covering a national-level campaign to literate students hailing from any part of the world.

For ensuring a better Cyber World in the market for numerous IT organizations, we have developed a "1 Year Diploma in Cyber Security" comprises Basic Networking, Linux Essentials, Python Programming, Ethical Hacking, Advanced Penetration Testing, Cyber Forensics Investigations, Web Application Security, Mobile Application Security, Internet of Things (IoT) Pentesting, End Point Security, AWS Associate, and AWS Security. Enroll yourself today!

## OUR TRAINING PARTNERS

CRAW Security Affiliate program, where you will promote our courses on your website or blog and start making money from it instantly without any special extra effort from your side. As we have 200+ certification and training programs, 70+ IT Professionals and certified instructors, and 30+ Authorizations, you do not need to worry about any course training, and instructor for training purposes, we will simply take care of this. We offer Registered and Authorized Certification from different Councils and Renowned Authorities, to our students from India and to the entire world as an Authorized Training Centre for Training & Certification.
